Time Capture Lite – Update Guide

Barcode, Touch Screen and Mouse/Keyboard compatible

Time Capture Lite is Free with Ostendo and will load automatically when you install Ostendo.

This guide covers updating Time Capture Lite for Ostendo Continuum and prior Ostendo releases. Eg Version 242

Ostendo Continuum allows for the screen file to be imported directly into the database. Previous versions required the screen file to be a separate file on the server.

The latest Time Capture Lite update files can be accessed from the Downloads section of :

<https://solutionm.com.au/apps/time-and-attendance/time-capture-lite/>

Ostendo Continuum Update – Time Capture Lite

1. Download the Continuum zipped file and un-zip it in downloads.

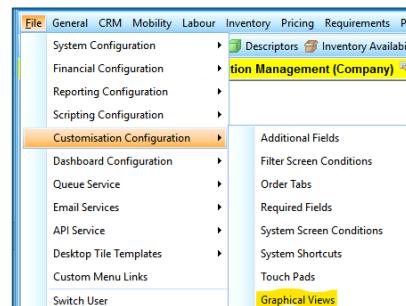

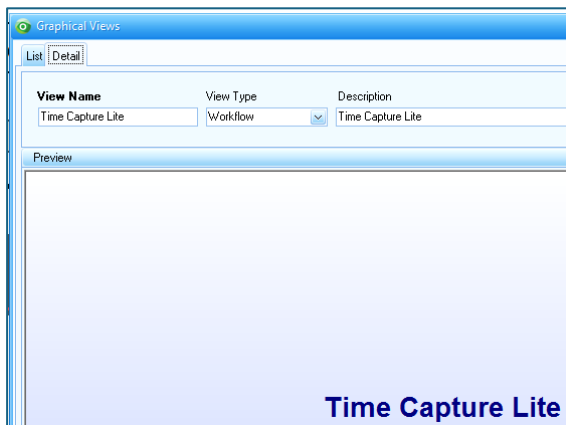

<https://solutionm.com.au/apps/time-and-attendance/time-capture-lite/>

Down Loads - Time Capture Lite Update Files

2. Load the screen file “Time Capture Lite xx.dat “ (xx represents the current version)

In Ostendo go to ‘**File -> Customisation Configuration -> Graphical Views**’ and click the ‘**Add**’ button.

Navigate to the screen file “Time Capture Lite xx.dat “ file then load the .dat screen file.

3. Load the Time Capture Lite script
4. Click **'File -> Scripting Configuration -> Script Editor'** and click on the **'Time Capture Lite [1.0]'** script name.
5. Click the **'Detail'** tab and link the Graphical View in the Data Screen File selection at the bottom.

6. Click the **'Script'** Tab and import the script / .txt file.

You can click Run to launch Time Capture Lite or close the script Editor and go to Custom -> Custom Data Screens -> Time Capture Lite.

This menu path can be assigned to your workflow or desktop tiles.

If you are using a scanner you can download the short cut barcodes from :

<https://solutionm.com.au/apps/time-and-attendance/time-capture-lite/>

Downloads – Time Capture Lite Shortcut Barcodes

For Ostendo versions prior to Continuum the same version can be used.

The only difference in the update process is the screen file "Time Capture Lite xx.dat " will need to be saved to the Ostendo directory and you will need to navigate to this file in step 5.

There is no Graphical Views function in Pre Continuum Ostendo releases.
